

VT Statewide Property Parcel Mapping Program

Jenny Bower, VCGI
January 2018

The Statewide Property Parcel Mapping Program is a program funded by the VT Agency of Transportation to create or update parcel data to meet the state data standard over 3 years.

USEFUL

Joinable to the Grand List at a 99% match rate, providing ownership and assessment information statewide.

UP-TO-DATE

Updates to existing data will be funded no matter how old the data is.

CONVENIENT

State map viewers such as the ANR Atlas and the E911 Viewer will reflect improved data, providing parcel data access to town officials and homeowners.

1.

Eligibility

All municipalities are eligible to participate. This project will update parcels statewide.

2.

Benefits

Municipalities are likely to benefit financially, as funds cover updating of parcel data and standardization.

3.

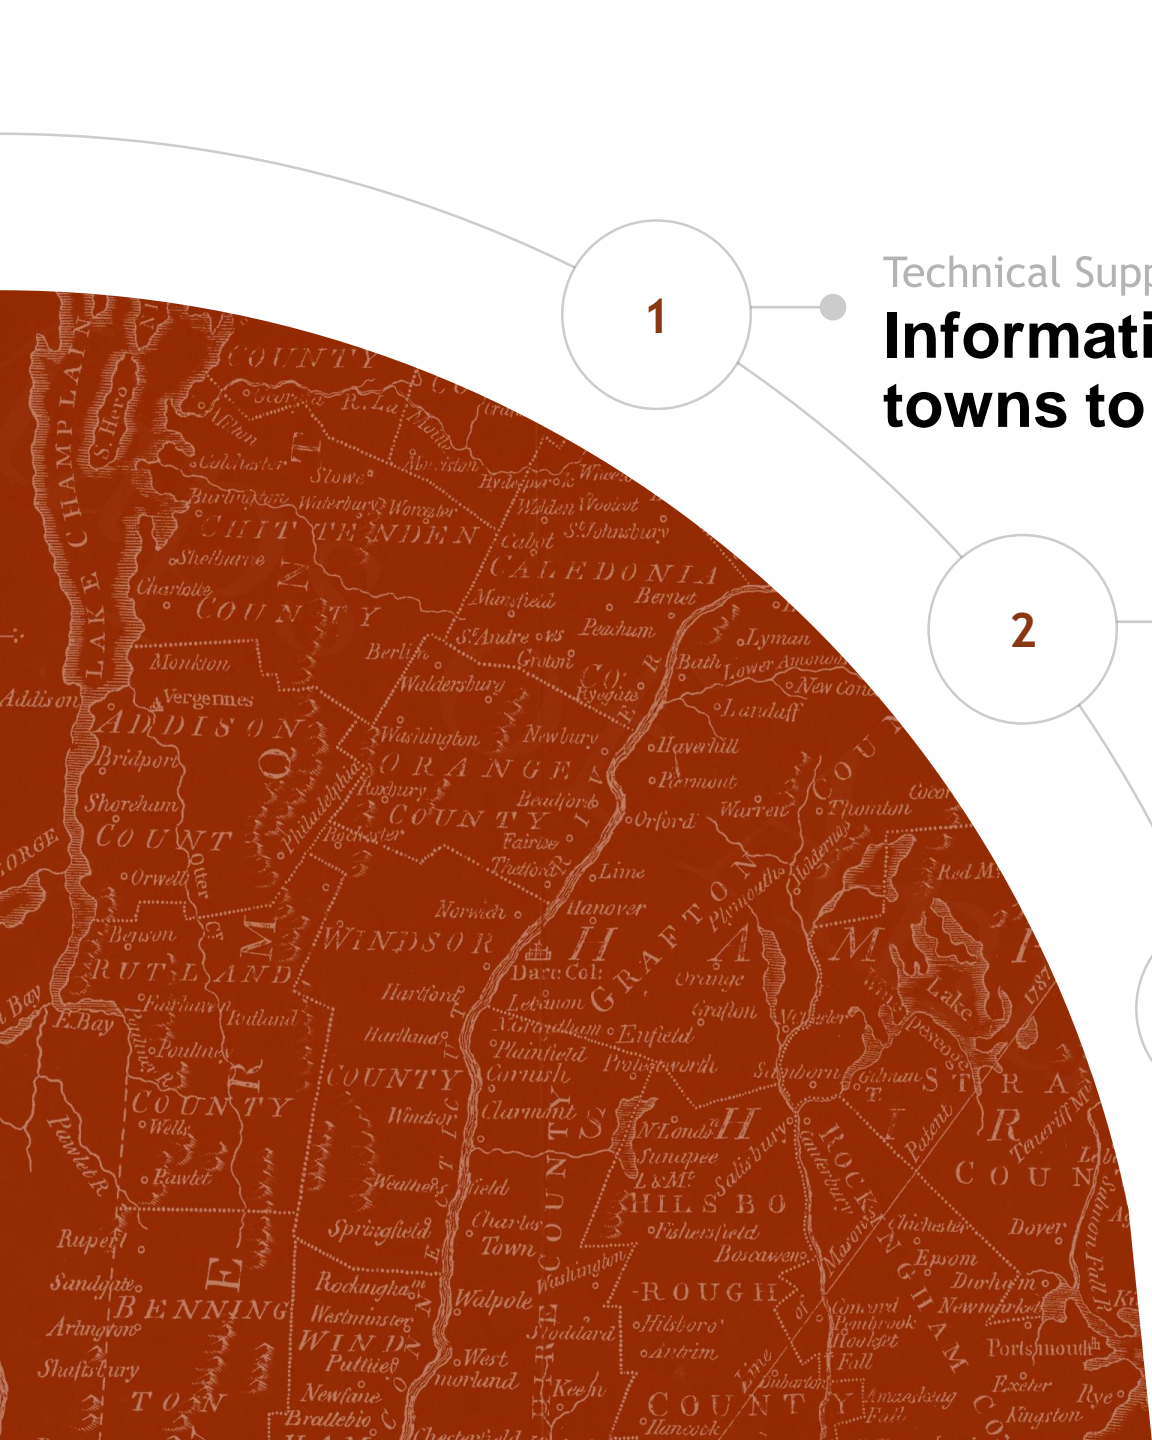

Funding

Project funds will only cover data, not paper maps (for this, towns should contract with a company).

4.

Vendor-based

This is not grant funding. VTrans contracted with 10 vendors & will assign them to towns (with town input).

1

Technical Support

Information and support provided to towns to support future updates

2

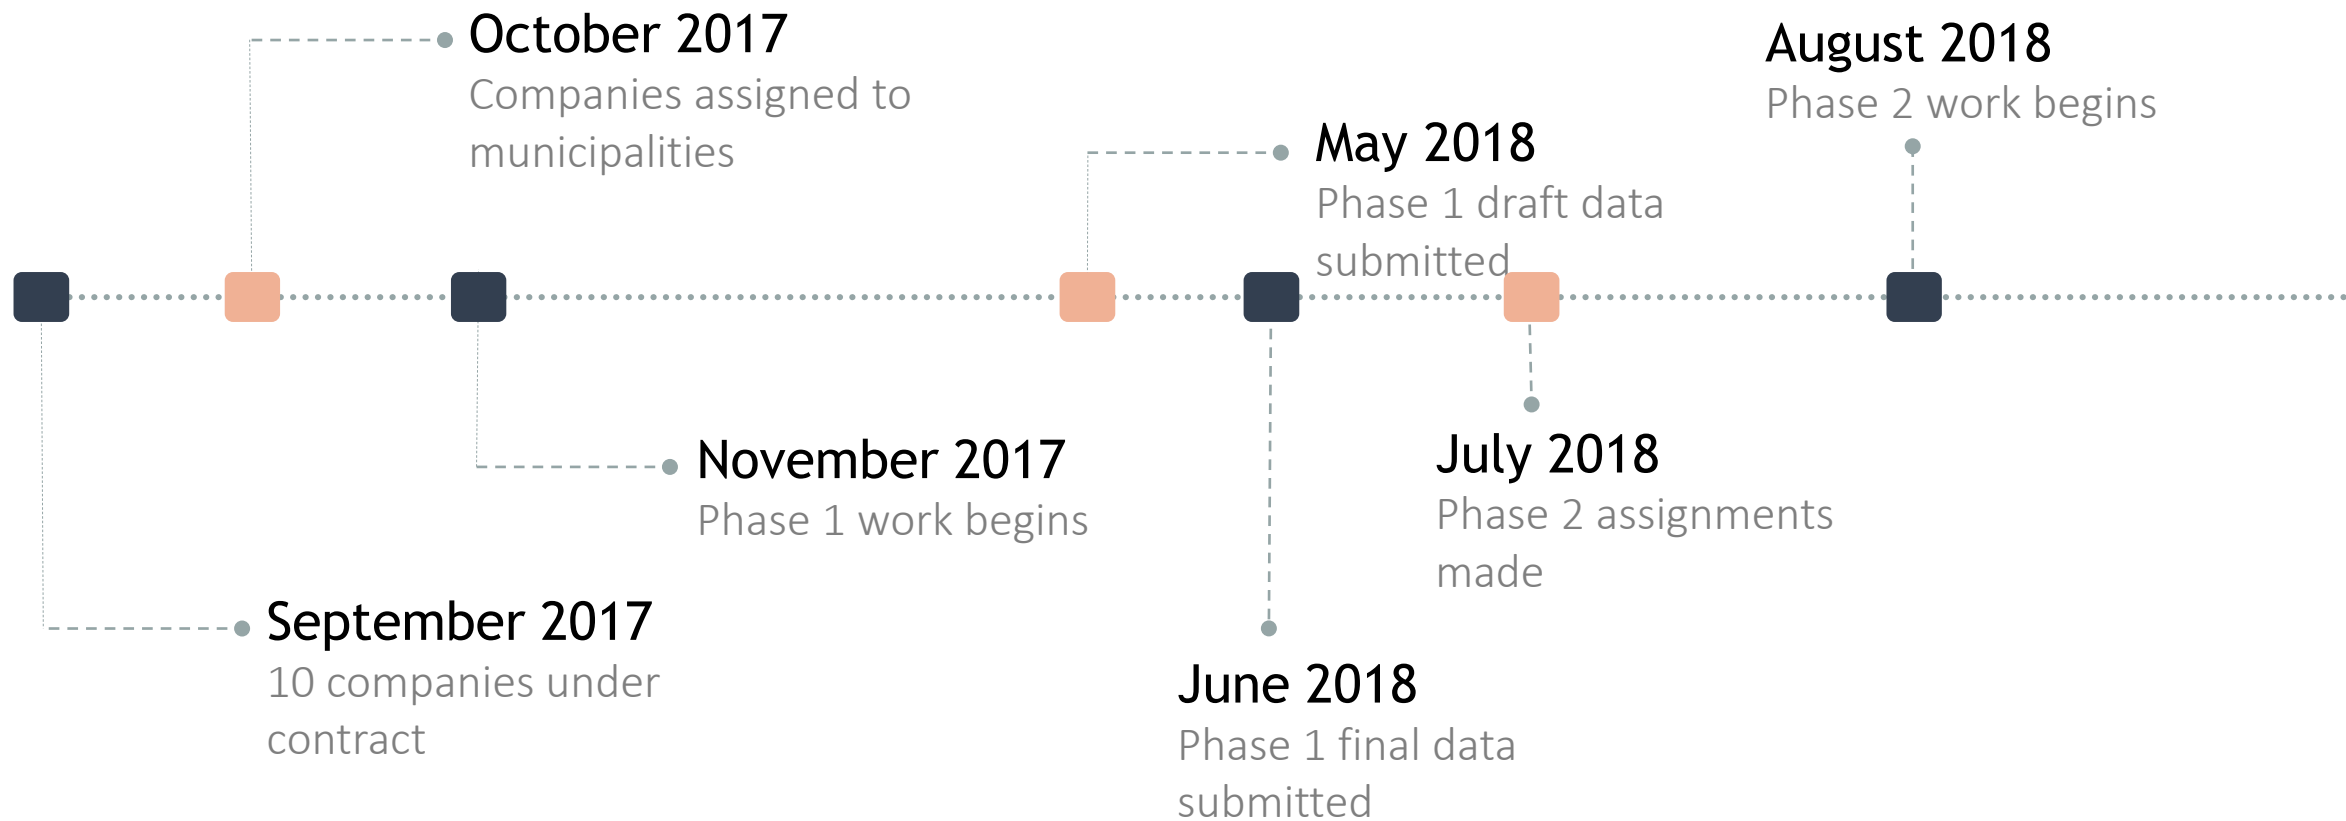

Data Publication

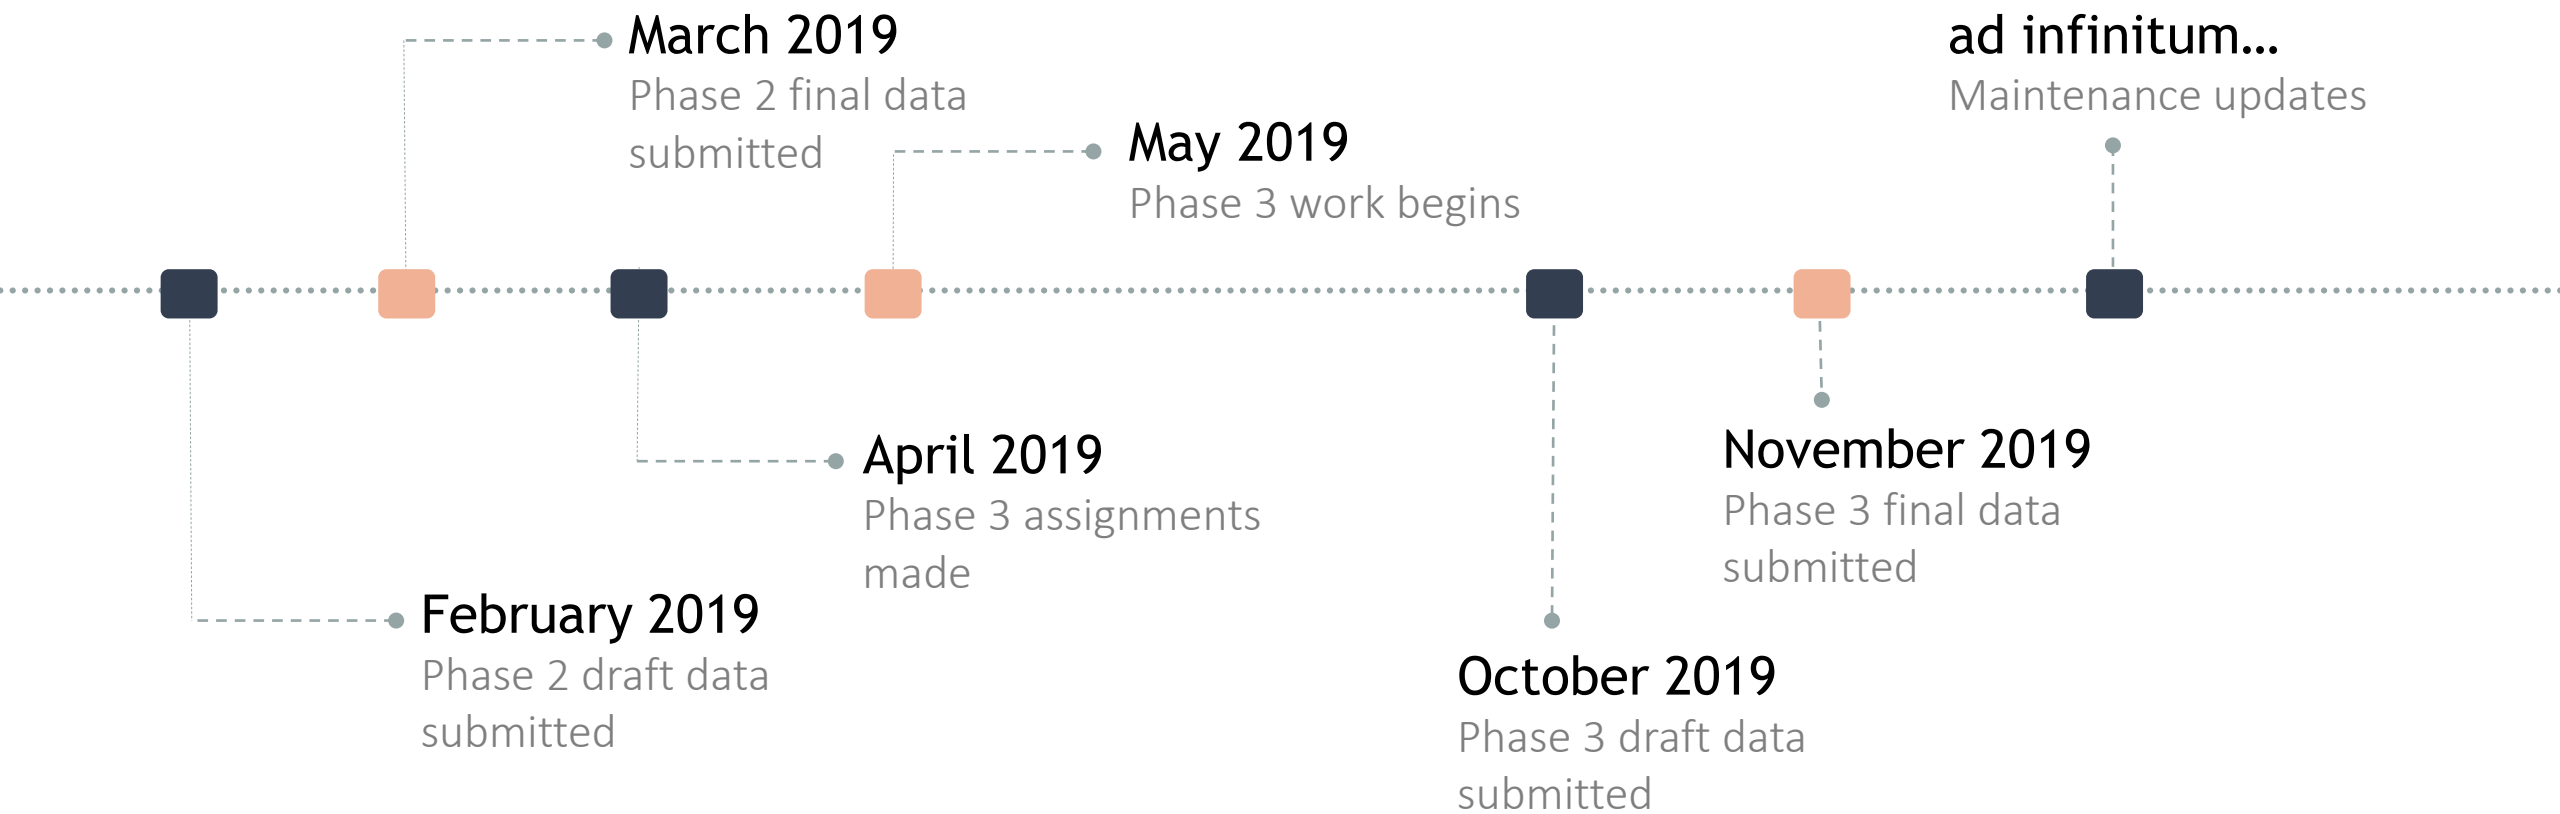

Standardized parcel data published continuously on rolling basis

3

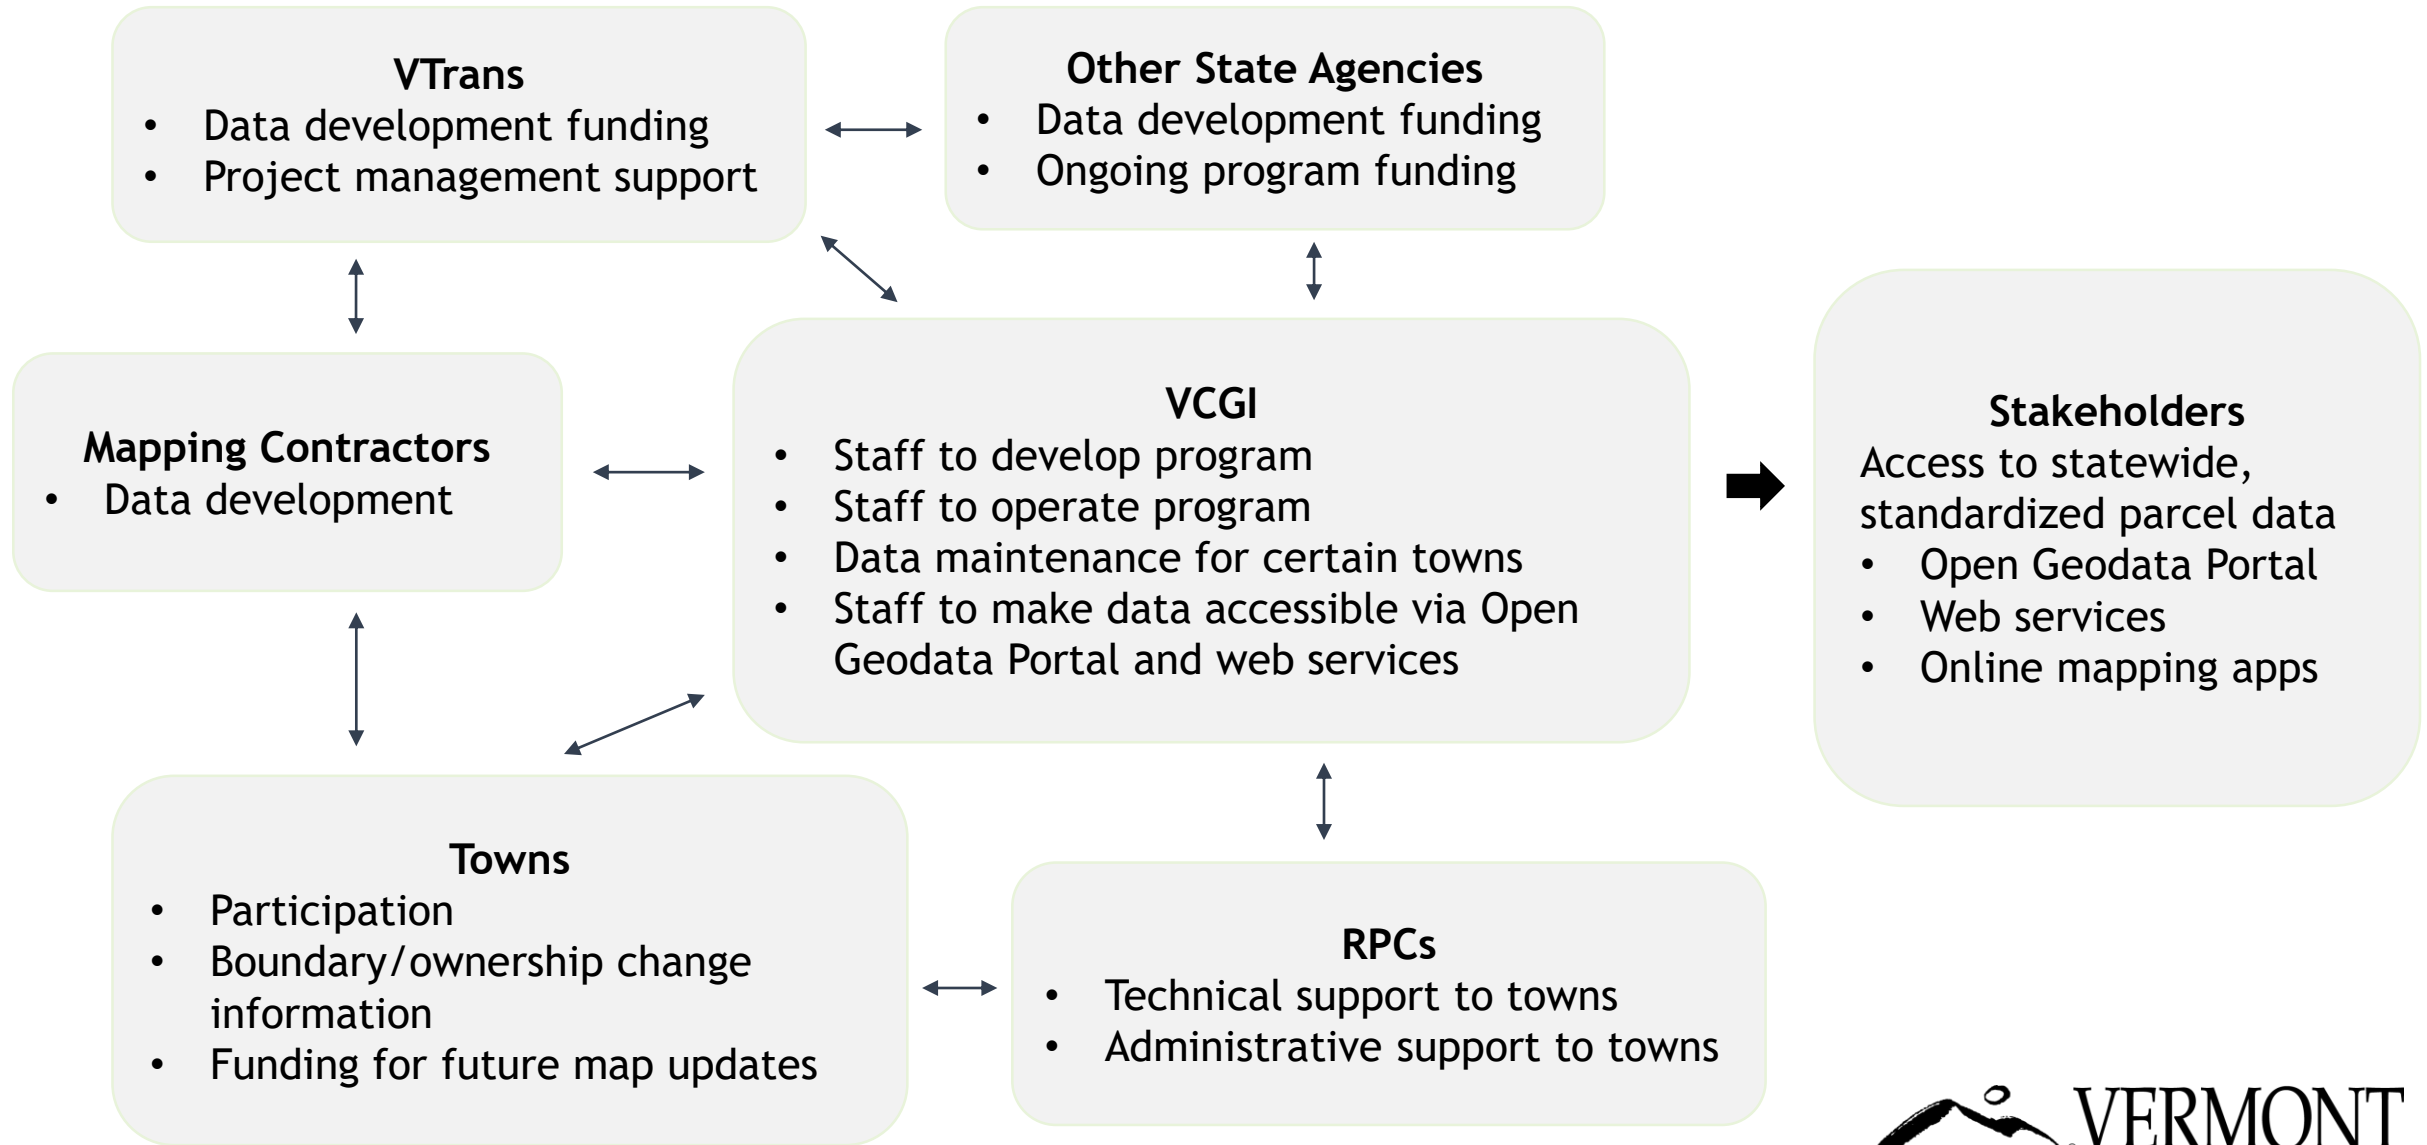

Maintenance Assistance

Strategic, efficient maintenance of parcel data

Program Ecosystem

Contact Info

- If your town would like to participate in 2018 (phase 2) or 2019 (phase 3), please reach out!
- Contact: Jenny Bower, Parcel Mapping Program Manager, VCGI
 - Phone: (802) 522-3054
 - Email: jennifer.bower@vermont.gov
- More information about the project will be posted as it becomes available at the VCGI website:
